

Recently we found lots supplier offer the very cheap price for bubble soccer ball in the open marketing. They used very good picture, great details. But we are confused, we are the manufacturer. **Our material cost even is higher than their selling price.** We checked our material cost, labour cost, shipping cost. We dont find any cost down information.

What's the problem ?

So we bought one ball from Alibaba supplier. We are shocked!

What's the difference between our Bubble Football / Bubble Soccer ball and other manufacturer ?

We compare the ball with our ball (1.5 meter (5 inch) diameter adult size, material 1.0mm PVC)

Let me show you some details:

1. The Diameter Size

The ball on the right is ours. It is 1.5 meter, left side is others (I bought they said it is 1.5 meter). You can see it is smaller than us.

Their ball is only 1.35 meter (4'5") diameter.

2. The Weight

Our ball weight is 12kg, their weight is 10.1kg. They short the material so the weight is short.

3. The Rope

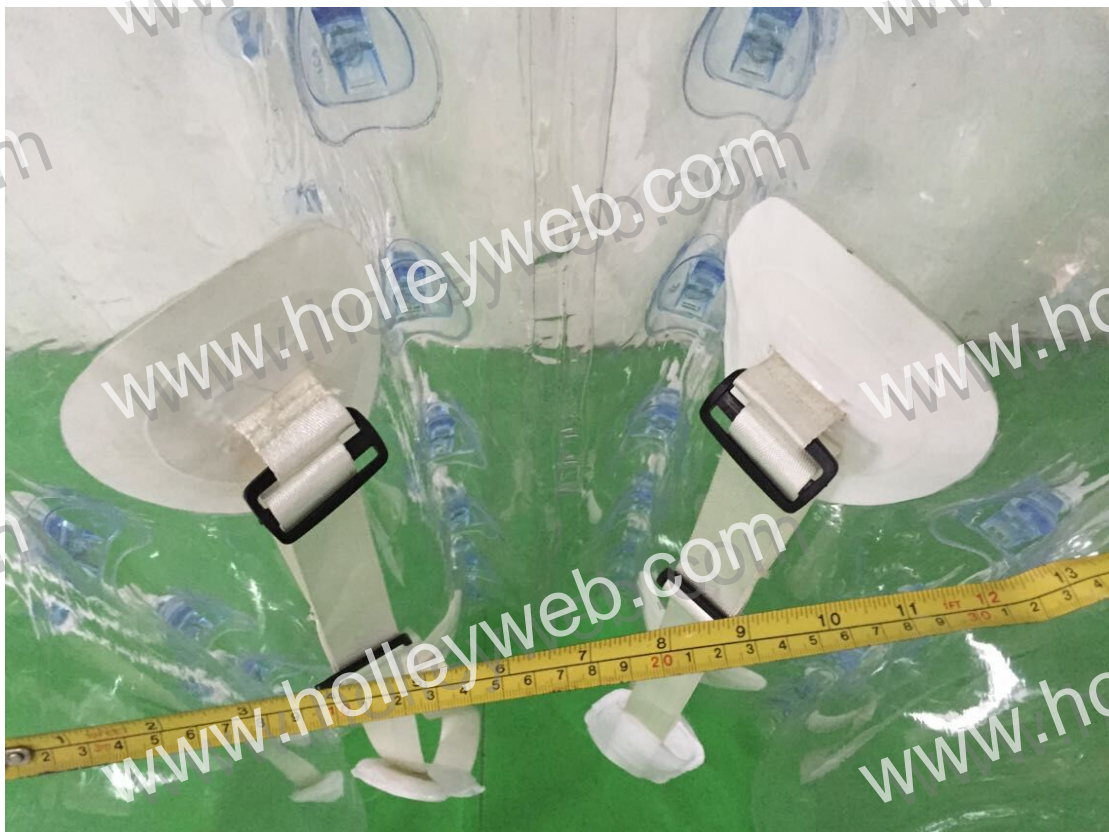

For the rope, our rope is round trip skill. Others is only one.

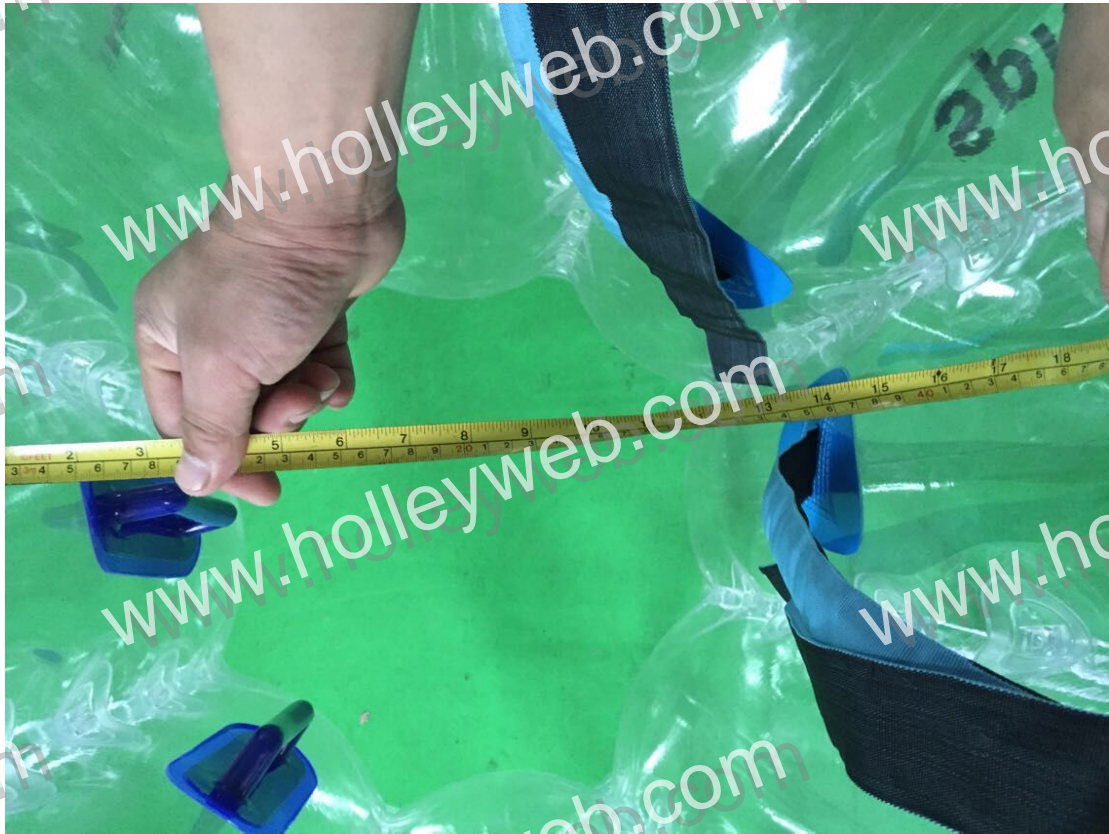

4. Inside Size

Our ball inside size is 50cm which is the right size for bubble soccer.

Others' ball inside size is ONLY 35cm, we don't know how a adult can be fit for this!

5. The Qty For The Button

The right button for the bubble soccer is 128pcs. ($8 \times 8 \times 2 = 128$)

The others' ball is 112pcs. ($8 \times 7 \times 2 = 112$)

6. Material

We used PLATO PVC which is durable and clear. Others used the common PVC, even 0.4mm*2pcs PVC instead of our 1.0mm PVC. They are bad and easy for quality issue.

So above details you read, do you think they are the same bubble soccer ?
Why their price is low ?

Please buy original best quality product from us. Cheap is not the only solution in the business. Hope these information can help you verify your final supplier.
